EDUCATION

Uttaranchal University

MCA

CGPA: 8.5

Dehradun, Uttarakhand

Expected Graduation, March 2025

PROFESSIONAL SUMMARY

Results-driven **frontend developer** with a strong foundation in HTML, CSS, Bootstrap and JavaScript. Skilled in building responsive, user-friendly websites using modern framework like **React JS**. Committed to staying updated with the latest industry trends and technologies, continuously enhancing skills to provide innovative solutions.

PROJECTS

Blood Bank Management System | HTML, CSS, JAVASCRIPT, JQUERY, PHP, MYSQL, BOOTSTRAP. **July 2024- Aug 2024**

A blood bank management system (BBMS) project aims to automate blood bank operations, improve transparency and efficiency, and reduce errors. The system can help with daily transactions, such as registering donors, collecting blood, and issuing reports. It can also store, process, and Analyze donor and inventory information, and allow users to view blood bank locations and availability.

Develop intuitive and user-friendly interfaces for different types of users, including medical staff, administrators, and donors. Coding: Write efficient, maintainable, and secure code for the application. This could include modules for donor registration, blood inventory management.

Weather Web-App | HTML, CSS, BOOTSTRAP, JAVASCRIPT, JSON, API. **Live Aug 2024**

Developed a weather app using Weather Api. Implemented features for real-time weather updates, daily and weekly forecasts, and location-based search. Utilized JavaScript and CSS to create a visually appealing and intuitive user interface.

User Interface (UI) Design: Creating visually appealing and intuitive interfaces that are easy to navigate.

Responsive Design: Ensuring the app functions seamlessly on different devices (desktop, mobile, tablet).

API Integration: Connecting the app to weather data APIs to retrieve real-time weather information.

Server-Side Logic: Implementing server-side functionality, such as data caching, and error handling.

Lucky-7 Game | HTML, CSS, BOOTSTRAP, JAVASCRIPT, REACT JS. **Live Aug 2024**

Designed and developed Lucky7, an interactive guessing where's the 7, where in the **Lucky-7 Game** you will see 9 cubes, out of these 9 cubes you have to click on one if 7 is behind it then you are lucky and you **WON** the game, otherwise play again.

Front-End Development: Built the game interface using HTML for structure, CSS for responsive design, and JavaScript for game logic. Implemented dynamic, real-time feedback through DOM manipulation.

Responsive Design: Created a fully responsive layout that adjusts seamlessly across different screen sizes and devices, ensuring optimal user experience whether on desktop, tablet, or mobile.

News Web-App | HTML, CSS, React JS, JAVASCRIPT, API, Firebase. **Live Sep 2024**

Developed a dynamic news aggregation website that fetches and displays the latest news articles from various reliable sources using News API. The site allows users to browse news by categories, search for specific topics, and filter articles based on popularity and publication date.

Built a responsive user interface using **HTML5, CSS3, and JavaScript (React JS)**.

Integrated **news APIs** for fetching real-time news articles.

Deployed the application on **Firebase Hosting**, ensuring high availability and scalability.

SKILLS

Programming: JavaScript, HTML5, CSS3, Bootstrap, MySQL, PHP, jQuery, React.JS.

Developer Tools: VS Code, Sublime Text, Apache, **Git**, **GitHub**, Bootstrap, Redux, NPM, **Firebase**.

CERTIFICATION

Earned a certification in Introduction to Advance Web Development – Microsoft Learn.
